Professional Summary

I've worked as a software developer since 2005, with experience in web, mobile, and DevOps.

I've also worked as a Tech Lead - Full Stack for two years, where my main responsibilities were to help the team develop and implement tasks requested.

In the last four years, I focused my efforts on studying and developing solutions that utilize Machine Learning, Data Science, and other AI tools.

Skills

- Python, FastAPI, Django, Flask
- JavaScript, ReactJS, React Native, Typescript
- TensorFlow, PyTorch, Pandas, Scikit-Learn, Numpy
- MySQL, PostgreSQL, MongoDB
- AWS, GCP, Git, Github, Gitlab

Professional Experience

GPA – Senior Mobile Developer - August/2021 – October/2024

Responsible for developing mobile applications and maintaining the admin web portal using React, JavaScript, Typescript.

BossaBox/Piwi – Senior Backend Developer – February/2024 – May/2024

Responsible for developing backend and frontend of applications using NodeJS, NextJS and React.

BossaBox/Arado – Senior Backend Developer – September/2023 – December/2023

Responsible for developing backend of application in Fast API and PostgreSQL.

BossaBox/Grafeno – Senior Full Stack Developer – February/2023 – July/2023

Responsible for developing frontend of Grafeno platform and supporting backend using NodeJS and Nest.

Nova Network Tecnologia e Educação – Tech Lead – March/2020 – January/2022

Responsible for developing applications with React Native, Redux, Typescript, maintaining backend developed in NodeJS and Python.

GPA – Senior Mobile Developer - June/2019 – March/2020

Responsible for developing mobile applications and maintaining the admin web portal using React, JavaScript, Typescript.

Blendmobi – Senior Mobile Developer - February/2019 – June/2019

Responsible for developing applications with React Native, maintaining mobile projects.

Kapmug - Senior Mobile Developer – November/2018 – February/2019

Responsible for developing finance-focused applications using React Native and Redux consuming API rest.

Totvs – Senior Mobile Developer - July/2018 – November/2018

Responsible for developing finance-focused applications using React, React Native with API rest consumption.

Go Receba Fácil – Full Stack Developer – February/2018 – July/2018

Responsible for developing web applications based on payment means and mobile applications, using Angular 4, ES6, Typescript, HTML5, SASS, CSS.

Grupo Flatbox – Full Stack Developer - October/2017 – February/2018

Responsible for developing web and mobile applications using Ionic 3 and React Native, Angular 4 and ES6, HTML5, SASS, CSS.

Vitamina Web - Frontend Developer - May/2017 – October/2017

Responsible for web and mobile applications with Ionic 2, Angular 4, Wordpress, HTML5, SASS, CSS.

E/OU MRM - Frontend Developer - October/2015 – May/2017

Responsible for web and mobile applications of the agency using PHP, HTML5, Angular 1, Ionic, and responsive email marketing development with foundation.

Education

Technology in Artificial Intelligence - FIAP - February/2022 – December 2023*Recognitions:*

1st place at SAP Challenger 2023 challenge, developing a data analysis platform using temporal series for prevention of rupture and suggestion of perfect stock.

1st place at BASF Challenger 2022 challenge, developing a project for sentiment analysis and comment classification for Customer Experience at BASF.

1st place at image recognition challenge with drone.

Certifications:

Artificial Intelligence Management - 2023

Computational Vision - 2023

Machine Learning - 2022

Cognitive Services - 2022

Computer Science – Mackenzie Presbyterian University - August/2018 – August/2021**Digital Communication - UNIP - February/2005 – April/2009**

Languages

Portuguese – Native speaker

English – Intermediate level

Spanish – Basic level
